

# CANADIAN PAYMENT SOLUTIONS

GET PAID FAST, on your own terms.

Squirrel Professional supports a comprehensive array of credit, gift, and debit card solutions – with high speed access to most transaction processors, which means you choose the electronic payment solutions right for your business.

And if you're concerned about credit card security, you should know that no cardholder data is stored on Squirrel client terminals. We were also one of the first to achieve the highest level of PCI PA-DSS validation and we remain committed to maintaining the topmost standards!

## CHOICE OF PAYMENT PROCESSORS

- Want more flexibility?

If the freedom to switch processors to get lower transaction costs is important to you, we deliver flexible solutions that will let you do just that. Choose from an extensive list of industry-leading processors and switch if you need to in the future for a plan that works best for you.

## PAY@TABLE™

- Looking to give customers more peace of mind?

Squirrel offers the Pay@Table solution, a convenient and portable system for processing payments right at the table. Squirrel interfaces with Chip & Pin capable devices, a technology used to help combat credit and debit card fraud.

## GIFT CARDS

- Need a way to manage and process gift cards?

With Squirrel's Gift Card module, you don't have any monthly fees since you host the solution yourself – pay once and you're ready to accept payment via gift cards. But if you're looking for a hosted solution, Squirrel Professional integrates with Givex and other gift card solutions from a number of payment processors.

## PCI-VALIDATED PAYMENT APPLICATION

- Doing enough to protect payment card info?

A Participating Organization with the PCI Security Standards Council, Squirrel Systems has achieved the highest level of credit card security validation – Payment Application Data Security Standard (PA-DSS).

However, a PA-DSS validated application to process card payments at the POS is just one part of your overall PCI DSS compliance obligations. If you need help achieving compliance, we can recommend a simplified, low cost set of tools from Vendor Safe.
